Welcome

The next edition of the Hunkeler Innovationdays is approaching fast, with the international industry event taking place at the end of February 2019. Industry leaders and specialists will convene at the Messe Lucerne exhibition center, where best-in-class manufacturers from the world of printing and finishing will come together over four days. They will present high-performance technologies for the next generation of digital printing and finishing, with integrated quality-control systems, workflow software and finishing materials and consumables for book, brochure and mailing production plus security and transactional printing.

More than 100 leading suppliers will present their latest products. Around 40 practical solutions will be exhibited in two modern exhibition halls. Several exhibitors have already announced the unveiling of some global and European premieres at the event. Hunkeler AG will have a strong presence to show visitors the broad range of the latest solutions of "Generation 8" systems.

The Innovationdays will be supplemented by the high-level forum: DOXNET-on-site (The Document X-perts Network) invites you to attend the presentations on Wednesday 27th of Feb. 2019 in the afternoon and join a buffet dinner in the evening.

The Innovationdays event slogan "Success with automation" refers to the convergence of important customers, technology and world-wide experts in Lucerne. We are very excited to present you the broadest state-of-the-art solutions portfolio for the digital printing and finishing sector, and we look forward to your visit in Lucerne!

Stefan Hunkeler

The thirteenth international print industry event

The event for trendsetters and technology leaders who will influence and set the pace for the next stage of industry innovation. Engaging conversations and a range of new ideas and solutions that will inspire you. The printing sector is changing at a rapid pace, and there is no event that reflects this dynamic activity better than the Hunkeler Innovationdays.

Hunkeler will mark the thirteenth staging of this important event, under the theme “success with automation”. Continuous workflow automation will be one of the focal points of Hunkeler Innovationdays 2019. Transactional printers, direct mailers, book manufacturers and commercial printers are seeing print run lengths decline, driving up the number of makeready processes. Efficient new production lines must minimize or eliminate manual interventions to save costs and increase margins. The “white paper in, finished product out” business model depends on advanced automation. Hunkeler will demonstrate the leading-edge automation now available on their Generation 8 production system platform.

Experience the high efficiency of end-to-end workflows over the entire value creation chain – from software to finished books, from idea to solution. Inline, nearline or offline – with tried and proven digital printing, or mapping the transition from conventional printing environments.

As always, Innovationdays focuses on practical issues. Experience this event in a unique environment and be among the first to discover our innovations up close!

Highlights and Solutions

Experience the Hunkeler Generation 8

Set new standards with Hunkeler's latest machine Generation 8:

- *"Excellence in Paper Processing 4.0" will feature many innovations for greater automation*
- *New modules for processing paper web widths of up to 22.5 inches with industrial-duty design*
- *Investment protection: be equipped for future printing speeds thanks to higher production speeds today*
- *Processing of a broad range of printing substrates, from offset and coated papers to light- and heavy-weight papers*
- *Dynamic finishing for perforation, punching, folding, chip-out, cutting and stacking*
- *Safeguard document integrity: integrated web monitoring, document tracking and reporting*
- *Intuitive operating platform and maintenance-friendly design*

Broad range of book production

From highly-flexible nearline solutions to highly-automated book production lines. Complete solutions from white roll to ready-to-ship books. From production of short-life, budget binding to efficient perfect binding and quality thread binding – from a print run of one to medium scale production runs. Variable sizes block quality produced from a single sheet feeder or glued book blocks for hard and soft cover design. Various book production solutions support diverse workflows.

Hunkeler offers practical, complete solutions with best-in-class book manufacturing partners.

Hunkeler will demonstrate the leading-edge automation now available on their latest production system platform.

Magazines, catalogs and brochures

Efficient production of digitally printed end products with dynamic content and number of pages in best quality.

Direct mailing and security printing

With dynamic solutions in the perforation and punching processes you will find innovative approaches for cash payment forms, coupons, creative mailings, checks, tickets, identifications and much more.

Trust is good – checking is better

Integrated quality control and document tracking based on state-of-the-art sensor technology and the latest standards for reliable production monitoring. Compact, exact and efficient solutions for all production and compliance applications.

Lucerne Carnival "Fasnacht"

The tradition of the Lucerne Fasnacht is a regional form of the Carnival. In 2019 the Carnival celebrations will happen concurrent with the Innovationdays, beginning on Thursday 28. February at 5 a.m. Fasnacht provides yet another reason to visit Lucerne in Central Switzerland and combine business with pleasure. Experience the customs, the cheerful locals and the colourful sights of this cultural center, the peak of Mount Pilatus, the trade fair site and the famous Lake Lucerne with many attractive hotels, restaurants, bars and clubs.

Registration

Stimulating discussions in a collegial atmosphere, great solutions in a compact space, new ideas and genuine innovations: this is an essential event for production print professionals, Innovation-days 2019 is expected to break new attendance records, so please register early to reserve your spot. Your email confirmation (e-ticket) will serve as a valid entry ticket. Your personal name badge will be waiting for you at the reception desk.

While registering online, you can also book your accommodations at a wide selection of Lucerne hotels at favorable rates.
