Choose **Ultimate Impostrip®**

Benefits

- + Cost effective
- + Fast & Powerful
- + Flexible & Dynamic
- + Easy-to-use & Intuitive
- **+** True Hybrid Printing

Testimonials

"With Ultimate Impostrip®, the work is organized automatically, and we save time and money. -With Ultimate Impostrip[®], we were able to switch right away to printing batches of orders instead of single books; we were able to load thousands of files instead of only a few dozen at a time."

– Lupa

"Ultimate Impostrip[®] worked spectacularly creating large imposition files of orders. It has allowed us to grow our business, finishing hundreds of orders daily, that otherwise would not be possible.

– Cober

"Ultimate Impostrip® is designed to be very flexible with page sizes, as well as support for all of the various imposition requirements of a mixed digital and offset production facility. Markond

Automation Drives Results

Automation drives results in printing. This is the foundation of all Impostrip® product developments and today, Print Service Providers worldwide benefit from increased productivity in a digital and hybrid environment. Impostrip® is about flexibility, power, speed and ease of use.

Ultimate TechnoGraphics invented digital imposition with the first release of Impostrip[®] in 1989 and has continued to play a leading role in the market by providing the most innovative imposition products. Ultimate TechnoGraphics today leads in imposition and finishing automation software solutions because of its deep understanding of the print manufacturing process. The company has a rich history of providing and integrating imposition technologies into hardware and workflow solutions for print and finishing industry leaders.

Pick the right Imposition Automation Solution for your needs

3 packages to choose from depending on your print environment

Ultimate Impostrip[®] Automation

Ultimate Impostrip[®] Scalable

The flagship solution delivering demanding applications.

Ultimate Impostrip[®] PassGate

The advanced solution for photo prints streaming and high-volume photobooks production.

Ultimate Impostrip[®] was designed with productivity in mind for all print applications

Ultimate Impostrip®

Automation

Superior Imposition Automation Solution

FEATURES

Easy Automation Hot Folders or XML connectivity with universal XML mapper

Intelligent Imposition Agent Automatically selects the best layout for your job

Easy Template Making Origami virtual paper folding for easy template making

Dynamic Ganging

No templates needed! AutoFlow Ganging for press and paper utilization optimization by grouping different jobs

Dynamic Templates[™]

Allowing the use of the same imposition layout for multiple size jobs simultaneously

Balance Section Template Numbering Sections that are entire single rows or columns, but not both

Multi-web and multi-template imposition

Adapt the imposition to web-fed presses requirements

Dynamic Barcodes For job tracking, quality control and finishing automation

Marks Profiles Define the relative position of marks on focused pages

Banner Profiles Automatic insertion of configurable banner sheets and banner pages with variable content and barcodes

PDF optimization and PDF/VT imposition (optional) Unparalleled performance for high volume transactional or variable data work

Advanced Offset Features More flexibility with color bar profiles, spot color and plate layouts

True Shape Nesting (optional) Create optimized layouts for true shapes using AutoNesting or impose files from the die library

Ultimate *Impostrip*[®] Intuitive User Experience Dramatically simplified navigation, improved visual, clarity and ease-of-use EN - 🌣 Top 1 Top 2 Bottom 2

Ultimate Impostrip®

Scalable

High Volume Imposition Solution

FEATURES

ALL FEATURES OF AUTOMATION PLUS THE ABOVE +

Scalable Server Solution

Combine multiple servers to meet the highest performance requirements

Job Manager

Distribute jobs the most efficient way across all available servers, insuring maximum throughput

Additional imposition servers (optional) Add as much imposition power as needed to meet your production requirements

Advanced Stacking Options

Batch files in an automated way based on optimizing stacks of similar or different jobs

Ultimate Impostrip[®]

PassGate

Photo Prints Streaming and High-Volume PhotoBooks Production Solution

FEATURES ALL FEATURES OF AUTOMATION AND SCALABLE PLUS THE ABOVE **↓**

Photo Batching Optimization Batch high-volume photo files from digital print online photo ordering

JPEG-PDF inputs

Automated JPEG conversion and rotation and the ability to use a PDF workflow

Multi-lane Optimization

Laying photo orders in same lane with a logic of First In, First Out

Ribbon Finishing Type Rearranging photo orders to minimize the generation of blank pages

Back-Side Printing Automation Allow adding valuable information to the back of the photo for maximum customization and photo tracking

Eliminate the bottleneck in finishing

Ultimate Bindery® validates jobs for finishing and delivers specific and precise finishing deliver consistent quality by standardizing job setup and finishing flows. Ultimate Bindery® automation and the generation of accurate data to complete these tasks automatically.

If your business relies on short-runs, web-to-print, hybrid printing, variable data printing, on demand books or transactional printing, complete your workflow with this key component for best-in-class finishing automation.

Finishing Workflow Enabler

Ultimate Bindery[®] is a stand-alone software solution that easily integrates into prepress workflow. It operates as an agent between the jobs in prepress and the post-press finishing in different quantities, on the fly, with no manual make-ready.

Preflighting for finishing

Beyond automation, Ultimate Bindery® offers the benefits of validation. It is a hub for the finisher it intends to use. Ultimate Bindery prevents inaccurate impositions to be sent

Plug n' Play

Ultimate Bindery[®] delivers a plug'n play application, integrating a prepress or print server

Device Drivers

Ultimate Bindery[®] has two components, the core product and the drivers for your varying finishing devices. It currently supports 20 drivers from 7 different manufacturers and the list

When you produce 1,500 or 2,000 jobs per month, even two minutes per setup represents a significant saving for us. Manual job setup can vary between operators and thus, changes the outcome. Manual setups can cause errors in bleed trimming causing waste.

– U.S. Inplant Printer Testimonial

Rooster IMC is a user of Ultimate Bindery® Software to eliminate manual make-ready on the booklet makers. These automated booklet production lines allow the company to considerably reduce delivery time, eliminate make-ready time and paper waste.

IS NOW MADE POSSIBI WEBSITE

The installation is flexible and can be done on a single computer, in a client-server environment or in a private cloud, and will also soon be available on a public cloud

1 Finishing Automation

Ultimate Bindery[®] is an automation tool that makes touch-less end-to-end workflow possible and profitable. Ultimate Bindery® offers a responsive web-based user interface allowing the management of finishing automation from a computer or a tablet. Operators and managers can now define and manage JDF finishing flows and automate each bindery device, each operating a specific finishing transformation on a printed project, from any location.

With a simple drag and drop, you can create, manage and edit a single or multi-vendor finishing workflow. Selecting your chosen devices is done in just seconds using available sorting filters. Finishing Flows can be set using Hot Folders or XML and can receive jobs automatically or highly optimized production. *Ultimate Bindery®* allows you to manually validate your finishing flows to facilitate the configuration phase.

Dashboard and Reports

Quickly see how many jobs are running, in error, on hold, as well as see how many jobs have been submitted to the different finishing devices with the visual dashboard. Along with shortcuts to the Job Manager, the dashboard also has shortcuts to the Reports section. This section contains the history of processed jobs which can be sorted and filtered. Data can also be exported to CSV, Excel or PDF format. An XML audit file can also be sent back to your management system for accounting and tracking.

4 Device Configuration

The configuration of devices is easier than ever. Ultimate Bindery[®] has built-in smart forms dynamically presenting configuration options based on the information you are filling in and allows you to customize your device's image. With a few mouse clicks, you can configure your device's network location and default specifications. Browsing a full list of devices is made possible using a table with the ability to sort and filter.

5 User Management

Create, edit and delete user accounts and assign user rights to view, edit or delete data of the different sections. The main administrator can also define account preferences such as database clean up options and more. Users can individually choose one of the software's multiple available languages. For a full list of options and languages, please refer to the website.

6 Job Management

View active jobs and quickly sort them out according to color-coded job status, selected Finishing Flow, creation date and more with the ability to validate jobs on hold, resubmit jobs, view validation errors or device timeout errors, read the error detail containing specific imposition mismatches, etc. Ultimate Bindery[®] can also return information to the MIS for complete reporting purposes
